Graepels and Decorative Perf

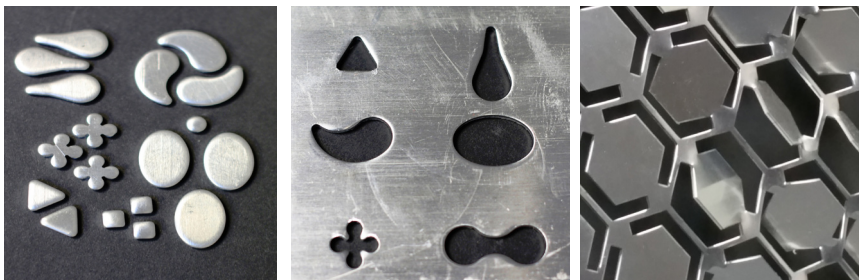

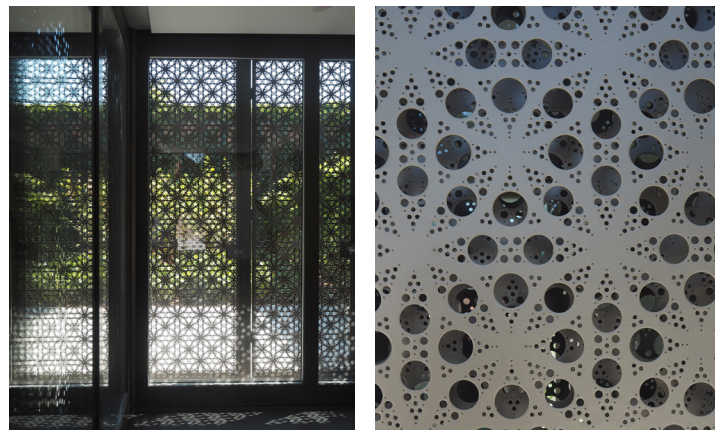

Decorative perf can be achieved in two ways; Firstly by using our huge range of current tooling which can be configured into a variety of patterns and configurations. The second by using a product known as 'Picture Perf' where an graphic or pattern is punched into sheet metal. Decorative Perf is available in a range of materials, including but not limited to: Mild steel, aluminium, stainless steel, brass etc.

Decorative Perforated sliding sunscreens these sliding screens were a bespoke design for a pavilion in Hemel Hempstead.

Bespoke/Custom made tooling; In addition to 'standard perforations' Graepels offer a range of decorative patterns available on a made to order basis. Should you not find an appropriate pattern listed, we have the ability to create any punch imaginable using a variety of configurations to create unique patterns for your project.

Decorative Perforations (sample selection)
